SUMMARY

A specialist in Java (Spring Boot) and JavaScript/Typescript (Angular17+), I am a Full-Stack developer. I have a strong interest in the web universe and its underlying ideas. I work best in a Linux environment, I enjoy freelancing, and I do best in agile teams. At the core of my professional approach is my commitment to privacy protection and safety. Adaptable, I am proficient in all technical phases of building a website or web application, from comprehending user requirements to front-end and back-end development and maintenance.
